Summary

Copywriter with 7+ years of experience writing for brands in Brazil and the US, from short-form video scripts to email nurture flows, e-books and landing pages. Wrote the ad that drove a luxury real estate agency's first-ever sale from paid media (a property worth about BRL 2 million).

A stint in QA and product taught me how digital products are built, so I write knowing why things work. Today I am a partner at Giracode, maker of the AI content platform Girapost, and I lead content strategy and release operations for artists at Tonos, a music company.
